Diphtheria, Tetanus and Pertussis (DTaP)			★	★	★			★†		★
Haemophilus Influenzae Type B (Hib)			★	★	★		★			
Pneumococcal Conjugate (PCV)			★	★	★		★			
Inactivated Polio Vaccine (IPV)			★	★		★				★
Influenza (Flu)					★ ★	Recommended yearly starting at age six months with two doses given the first year				
Measles, Mumps and Rubella (MMR)						★				★
Varicella (Chicken pox)						★				★
Hepatitis A (HepA)						★ ★	First dose: 12-23 months Second dose: 6-18 months later			

★ One dose
 Range of recommended dates

† The fourth dose of DTaP may be given as early as 12 months, if at least six months have passed since the third dose.

* Based on Centers for Disease Control and Prevention recommendations. Under the Affordable Care Act, certain preventive health services are paid at 100% (i.e., at no cost to the participant) conditioned upon physician billing and diagnosis. In some cases, you may be responsible for payment on certain related services that are not guaranteed payment at 100% by the Affordable Care Act.

This is proposed timing for children without any known symptoms who are at low risk. The schedule should not be used in place of the medical care and advice of your child's doctor.
