

It pays to shop for care with HealthSelectShoppERS

As a HealthSelect of Texas[®] participant, you can compare costs for certain services and procedures at in-network facilities through the HealthSelectShoppERSSM program. HealthSelectShoppERS may even help you save money on quality health care and earn rewards for choosing cost-effective care.

If you are an active employee and are enrolled in HealthSelectSM of Texas, HealthSelectSM Out-of-State or Consumer Directed HealthSelectSM, you may be able to take advantage of HealthSelectShoppERS. (Retirees and Medicare primary plan participants are not eligible.)

READ ABOUT MIRIAM'S EXPERIENCE:

Miriam is feeling tired, has shortness of breath and swelling in her legs so she visits her primary care provider (PCP). Her PCP is concerned that she may have early signs of heart disease, especially since she has a family history of it. She recommends Miriam see a heart specialist and submits a referral to Blue Cross and Blue Shield of Texas (BCBSTX) for an in-network doctor.

Heart disease is the leading cause of death in the United States. 1 in 4 deaths in the U.S. are related to heart disease[†]

about

125 procedures and services qualify for HealthSelectShoppERS incentives for eligible participants

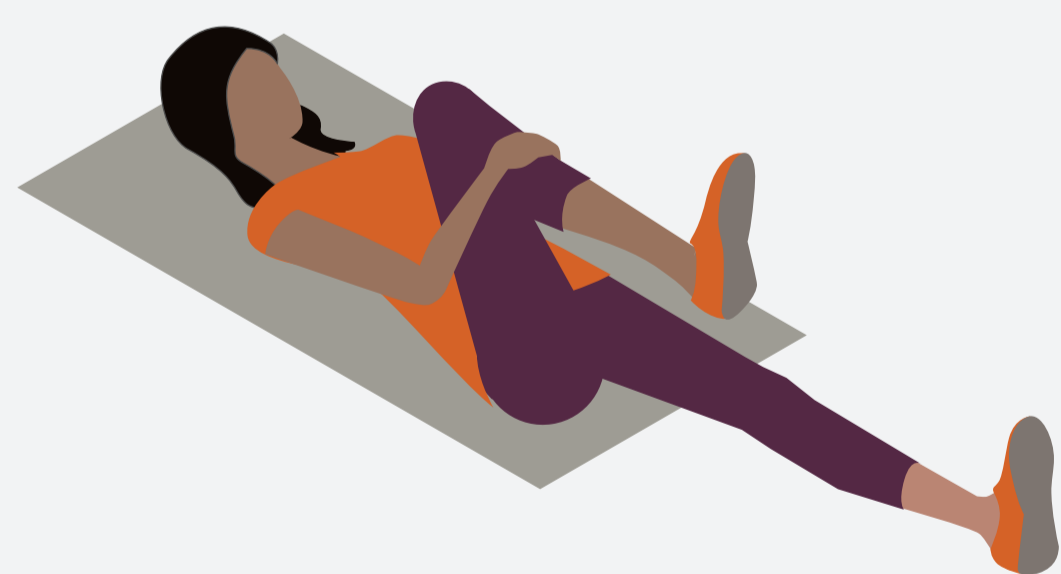

Miriam's heart specialist orders a cardiac CT and submits a request to BCBSTX for prior authorization. Miriam logs in to Provider Finder[®] to find in-network imaging centers nearby. She is pleased to find CT providers that qualify for HealthSelectShoppERS rewards.

HealthSelectShoppERS incentives vary from \$25 to \$500, depending on the procedure and where you have it performed

Miriam finds a lower-cost, in-network facility with high quality ratings to perform her cardiac CT. It's eligible for a \$100 reward that will be deposited into a TexFlex FSA for her. Eligible participants can earn up to \$500 per plan year per household.

Incentives Vary \$25-\$500

Maintaining a healthy weight by getting regular exercise, eating balanced meals and limiting alcohol intake can help reduce your risk for heart disease[†]

Miriam's CT scan results show early signs of heart disease. Her doctor recommends she make changes to her diet and exercise. If these changes don't improve her condition, she may need medication in the future. Miriam's symptoms were caught early, and she commits to healthy changes. Miriam even finds resources in Well onTarget[®] to help her manage her new healthy habits.[‡]
